

To complete the CASSIO installation you will need to do the following:

1. Go through each step of this AutoCAD 2008/LT 2008 Update Pack.
2. On completion of the update you will be prompted to select a method to install the main CASSIO 4 software. At this stage you will need either a CASSIO 4 CD or a CASSIO 4 web-install file. You MUST have one of these in order to complete the installation process. If you do not have one of these, please visit www.SpiraxSarco.com/cad and download the latest version of CASSIO.
3. Upon selecting a setup method the standard CASSIO 4 installation will start automatically. This setup will not contain any installation options for 2008 so when prompted to select which version of CASSIO to install, select the 'CASSIO for AutoCAD LT 2000' option.
4. When prompted to select your root AutoCAD folder, be sure to select your 2008 root folder. This is usually C:/Program Files/AutoCAD 2008 (if you have Full AutoCAD) or C:/Program Files/AutoCAD LT 2008 (if you have AutoCAD LT).
5. At the end of the CASSIO installation you may be prompted to install Volo View. This software is not required if you have 2008, so click 'No' to skip this part of the setup.

When the CASSIO 4 setup completes you should be able to run CASSIO by launching AutoCAD in the normal way.

If in doubt, or you experience any problems please contact CASSIO Support at CADEnquiries@SpiraxSarco.com
