

## Model F50C Isolating Valve

### Description

The F50C is a needle type isolating valve designed for primary isolation in flow metering applications with steam and other industrial fluids.

### Material

No	Part	Materials
1	Body	Carbon steel zinc plated and passivated
2	Seals	Graphoil (not shown)

Maximum operating pressure: 5990 psig  
 Maximum operating temperature: 806 degrees F

### Dimensions (approximate) in inches

A	B	C	Weight
2.6	1.1	3	1.1 lb

### Connections

0.5" NPT female (both ends).

### How To Specify

Model F50C Isolating Valve.
