

Winter is Coming *Get Prepared Now!*

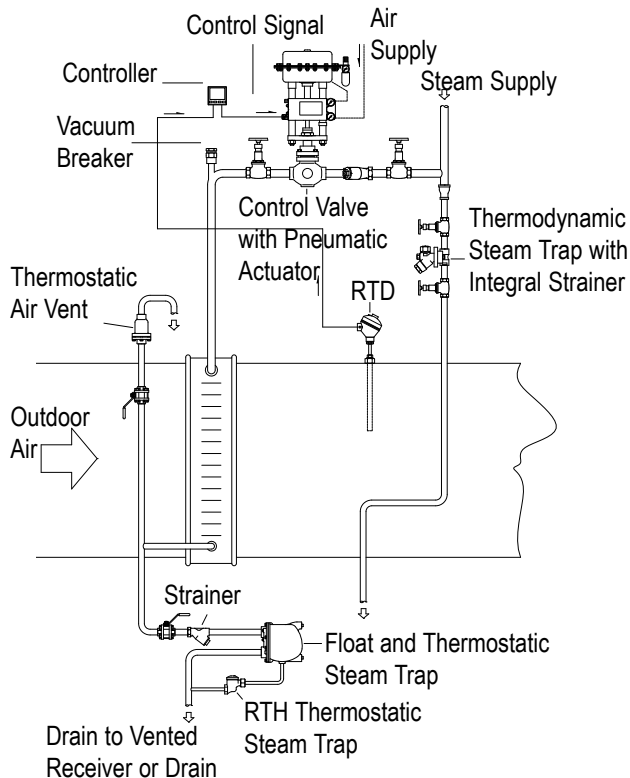

Are the components in your steam system in good working order and able to handle freezing temperatures? Do you know how to check your heating coils, steam traps, condensate pumps and other crucial parts to ensure potential freezing problems won't plague you this winter? With our expertise, we can offer you the most extensive range of products and services to provide you with peace of mind heading the into the cold months ahead.

Two ways to minimize risk:

1. Outside or Rooftop Air Handling Coil with Freeze Protection and Gravity Drainage

Full condensate drain at 23°F below saturation temperature.

Thermostatic steam trap will empty trap body on shutdown to prevent freezing the trap and coil.

2. Bydrain Freeze Protection Liquid Expansion Trap

Full condensate drain at liquid temperature of 36°F.

This compact trap is a low cost, easy to install defense against pipe freezing that can be installed on the equipment or downstream of the equipment to be drained.

Contact us today to make sure you are properly protected against the elements!
