

FOR IMMEDIATE RELEASE

SPIRAX SARCO INTRODUCES FREE IPHONE APP

Blythewood, SC – December 1, 2010 – Spirax Sarco, Inc. would like to introduce our free application to assist customers and sales engineers when identifying the right steam tools for the job. The Steam Tools app enables quick and easy access to both our Steam Tables and a Saturated Steam Pipe Sizing tool.

The Steam Tables cover the thermodynamic data for water/steam, supporting the design and operation of expert steam/water equipment. You simply need to enter a pressure or a temperature into the app, returning:

- The corresponding pressure or temperature
- Sensible Heat, hf (water)
- Latent Heat, hfg (evaporation)
- Total Heat, hg (steam)
- Specific Volume (steam)

The pipe sizing tool allows access to Saturated Steam pipeline data, helping you to size a pipeline. Also, to enhance the feature settings, both tools offer the output of this data into a range of different standardized units.

Download today at the Apple Store and search for “steam tools” to get access to this useful tool. Also get the opportunity to see what else Spirax Sarco has to offer. Plus sign up to our service to keep up to date on future enhancements and our products.

About Spirax Sarco, Inc.

Spirax Sarco provides knowledge, service, products and turnkey solutions for the control and efficient use of steam, air and other industrial fluids for industrial and commercial users in the United States. With over 100 years of expertise across many industries, our holistic approach allows us to apply unequalled engineering knowledge in putting together complete solutions for our customers needs.
