### Applications

The SV60 is suitable for the protection of steam boilers, pipelines, pressure vessels, compressors and receivers and most general process industry applications.

### Certification

A manufacturers' Typical Test Report is provided as standard for each valve which will include valve set and hydraulic test pressure. Also available on request is material certification in accordance with EN 10204 3.1.

### Standards and approvals

The SV60 carries the  mark and complies with the requirements of the Pressure Equipment Directive (PED) falling within Category 4 for Group 2 gases.

Seat tightness to ASME/API Standard 527-1992.

Lloyds Register (LR) type approval - Certificate number 01/00125 (E2).

The SV604 (PN flanged) is approved by the TÜV to AD-Merkblatt A2, AD-Merkblatt A4, TRD 421, Vd TÜV 100, 100/4.

### Sizes and end connections

## Safety information, installation and maintenance

For full details see the Installation and Maintenance Instructions (IM-P137-01) supplied with the product.

### Installation note:

The safety valve should always be fitted with the centre line of the spring housing vertically above the valve. Open bonnet valves are recommended for all steam boiler applications and **must be used** for valves fitted with Tungsten alloy springs.
